

More than just a firewall.

Security breaches can occur from multiple areas of penetration, not just one. That means that conventional security approaches that rely on one barrier, like a firewall, just won't cut it.

Our complete, comprehensive security services take each point of entry into consideration. We look at it all: digital vulnerabilities; human error; natural disasters; even physical locations that could allow unrestricted access to your network. We plan, strategize, secure, and fortify every possible digital nook-and-cranny that could result in data loss or downtime.

The result is a powerful security strategy that protects your organization and your assets from the inside out.

SECURITY ASSESSMENT

The Dynamic Quest Security Assessment will review your environment to identify risks that could negatively impact the confidentiality, integrity and/or availability of your critical business systems and information. This Assessment is designed to review your key technology assets, current security strategy, controls and IT infrastructure in order to prioritize your top vulnerabilities, risks and recommended security controls.

SECURITY GOVERNANCE

We will work with you to plan and implement a security strategy that aligns with your unique business goals and objectives. We will focus on protocol and procedures pertaining to:

- Data classification
- Remote access controls
- Acceptable use

UTM (UNIFIED THREAT MANAGEMENT)

Modern businesses face a wide variety of threats, and a single tool does not offer adequate protection. Our integrated UTM solution combines multiple technologies into one overarching, multilayered defense strategy. Tools include:

- Intrusion Prevention System (IPS)
- Gateway anti-virus and anti-spyware
- Dynamic content filtering
- Application intelligence control
- Advanced Threat Protection

NEXT GENERATION ENDPOINT PROTECTION

Unlike traditional anti-virus solutions, next-generation endpoint protection uses predictive analysis to block web applications, dangerous URLs, potentially unwanted apps, and malicious code from ever touching your endpoints. We will review and/or implement:

- Anti-virus protection
- Advanced malware protection
- Advanced learning program

SECURITY AWARENESS TRAINING

Almost all ransomware incidents are initiated by well-meaning employees who click on malicious links sent via email. We will evaluate, educate, and test your employees to decrease the possibility of a phishing attack. Services include:

- Education via interactive learning modules
- Simulated phishing attacks
- Threat & weakness reporting

24/7 MANAGED DETECTION & RESPONSE

We will continuously monitor your cyber assets to detect threats and vulnerabilities which may have bypassed other security controls. Our 24/7 threat monitoring services include:

- Real-time threat intelligence
- User behavior analytics
- Monitored SIEM
- Machine learning

REGULATORY COMPLIANCE REVIEW

We can assist your organization with the most demanding compliance and regulatory needs related to client's privacy and digital information. We will review compliance needs and assist with remediation.

- HIPAA
- PCI
- CJIS
- SOX

PHYSICAL SECURITY INSPECTION

Our complete security services extend to the real world, too. We will inspect your physical locations which may contain sensitive, unprotected data, including:

- Server rooms
- Network closets

BACKUP & DISASTER RECOVERY

Our comprehensive disaster recovery program will protect critical business information and help recover data more efficiently in the event of a disaster. We will review and/or implement:

- Disaster recovery plan
- Server/workstation backups at file/image level
- Secure data storage
- Off-site data replication

When implemented together, these services are a powerful security strategy that protects your organization.

IT expertise, strategically focused on your business goals.

Dynamic Quest is a Managed IT and cloud services provider serving customers across multiple industry verticals. Our advice and service is always strategically focused on furthering your business goals—including stability, process improvement, cost control and growth.
